

Why choose Timber Frame?

Timber Frame is:

- The modern, sustainable, low energy method of build.
- The natural choice to help achieve high Code for Sustainable Homes ratings.
- Pre-fabricated to the highest standard, reducing many site issues such as snagging and non-conformity.
- Quickly and safely erected to give early wind and water tight structures, saving up to 20% build time.
- Less weather dependent, enabling a more predictable building programme.
- Fully compliant with all current structural, thermal, fire and acoustic building regulations.
- Manufactured from the world's most renewable construction material.

Who are we?

Oregon Timber Frame Ltd is one of the UK's largest independent timber frame manufacturers. We specialise in the design, manufacture and erection of timber frame structures for the construction industry.

We are:

- Specialists in timber frame with a strong track record in housing and commercial markets.
- Focused on understanding the requirements of clients in public/private housing and building contractors.
- Committed to providing research based, innovative, highly engineered solutions in timber.
- Experienced in whole project, cost effective answers which deliver real value for money.

We manufacture complete structural platform timber frames comprising wall panels, both open or pre-insulated, and roof and floor cassettes.
